When the bus is being welded, please turn off the automatic gearbox, centralization system, pole switch of the battery at the same time to avoid damaging the electrical instrument.

Contrôleur de charge à détection de courant

The image shows a close-up of a white, curved luggage rack installed on the ceiling of a vehicle. The rack has a grey textured panel in the center. Above the rack, the ceiling is covered in white material with a grid of gold-colored stitching. A small circular lock is visible on the left side of the white panel. A red-bordered sign is attached to the side of the rack, providing weight capacity information in Chinese and English. The overall scene is brightly lit.

The image shows the interior of a vehicle, likely a truck or a large van, with rows of seats on the left and a large storage compartment on the right. The storage compartment has a white, ribbed door. A watermark logo for 'MOTORLAND' is visible in the center. The logo consists of a stylized 'M' inside a circle, followed by the word 'MOTORLAND' in a sans-serif font.

The image shows a close-up of a car's interior, specifically a dark grey fabric seat with a diagonal ribbed pattern. Below the seat, a silver-colored metal plate is mounted, featuring two circular USB charging ports. A blue banner at the bottom of the image contains the text 'Ports de charge USB'. A semi-transparent 'MOTORLAND' logo is centered over the image.
