Tableau de bord

The image shows a close-up of a silver-colored control panel, likely for a vehicle's interior lighting or climate control system. The panel features a central rectangular opening with a horizontal slot at the top. Above this slot is a small circular hole. To the left and right of the central opening are two vertical rectangular slots with a textured pattern. Between these slots is a row of four small rectangular buttons. The second button from the left is labeled "DOOR". The other three buttons each contain a small icon: a single wavy line, a double wavy line, and a triple wavy line respectively. The entire panel is set against a dark, textured background.
